PROFESSIONAL SUMMARY

Final-year MCA student with hands-on experience designing and shipping full-stack web applications and backend services from REST APIs and dual-schema data architectures to production-style React/FastAPI/Flask systems. Built a Chrome extension backed by a Flask REST API processing requests in under 300ms, a dual-database (SQL + MongoDB) job portal handling 300+ records with a unified query layer, and an agentic monitoring system with a FastAPI backend and React dashboard. Comfortable across the stack Python, Java, JavaScript, Node.js, SQL/NoSQL with additional depth in applied ML. Seeking an SDE-1 role to build reliable, scalable software for high-traffic e-commerce systems.

TECHNICAL SKILLS

Languages	Python, JavaScript, Java, C
Backend	FastAPI, Node.js, Flask, REST APIs, CORS, uvicorn
Frontend	React, TypeScript, Vite, Tailwind CSS, JavaScript, Chrome Extension (Manifest V3)
Data	SQL, MongoDB, Power BI, structured & unstructured data processing
Dev Tools	Git, VS Code, Postman, Arduino IDE
AI / ML	Python, scikit-learn, pandas, NumPy, NLP, TF-IDF, IsolationForest, feature engineering, anomaly detection, IBM Cloud AI
LLM & Agents	HuggingFace Transformers & Inference API, prompt engineering, agentic loop design (OBSERVE→REASON→ACT→MEMORY)

PROJECTS

Dark Pattern Detector — Chrome Extension — Python · Flask · JavaScript · Manifest V3

- Built a Chrome Extension (Manifest V3) detecting 8 categories of deceptive UI patterns across e-commerce sites with ~82% precision on a 200-page test set.
- Designed REST + CORS frontend-backend communication between the extension and a Flask API; processed page content in under 300 ms average latency.

Job Portal Application — SQL · MongoDB · Node.js · React · Data Modelling

- Designed dual-schema architecture (SQL for structured job listings + MongoDB for candidate profiles) supporting efficient filtering and ranking across 300+ mock records.
- Demonstrated multi-source data integration with a unified query layer abstracting relational and document stores.

Sentinel-Agent v2.0 — Agentic API Monitor — Python · FastAPI · HuggingFace · React · TypeScript

- Designed and built an autonomous API monitoring system with a modular OBSERVE→REASON→ACT→MEMORY pipeline, processing 500+ simulated API events using rule-based + LLM hybrid logic.
- Integrated HuggingFace Inference API for severity classification, tool selection, and natural-language incident reasoning; reduced false-positive alert rate by ~35% vs. rule-only baseline.
- Developed the FastAPI backend and React dashboard with a rule-based fallback path, ensuring 100% uptime when the LLM dependency is unavailable — a resilience pattern for production services.

Sprucer — NLP Resume Analyser — Python · NLP · scikit-learn · TF-IDF · Cosine Similarity

- Built an end-to-end resume analysis pipeline scoring candidate-JD fit from raw text; achieved 87% classification accuracy across 100+ resumes using TF-IDF + cosine similarity.
- Applied prompt-style decomposition logic to parse unstructured resume sections into classifiable signals — a direct precursor to LLM prompt engineering.

EXPERIENCE

Junior Software Developer Intern | Edutainer

Feb 2026 - Present

- Completing a structured 4-month curriculum covering React, cybersecurity, network architecture, and software development practices.
- Built and shipped front-end components in React as part of the internship capstone deliverable.

Virtual Intern — AI + Cloud | IBM SkillsBuild & IBM Cloud

2024

- Completed IBM's Enterprise-Grade AI track; applied cloud AI tooling to a sample data classification workflow.
- Earned IBM certification: Getting Started with Enterprise-Grade AI.

- Built a real-time weather monitoring system using IoT sensors and Arduino IDE — involving continuous data collection, sensor integration, and live data processing.

EDUCATION

Master of Computer Applications (MCA) | RV Institute of Technology & Management

2024– 2026

CGPA: 8.9 | Specialization: Data Science & Analytics (3rd Semester)

Bachelor of Computer Applications (BCA) | Surana College

Completed

SGPA: 8.42

CERTIFICATIONS

- IBM — Getting Started with Enterprise-Grade AI
- Power BI Data Visualization — Quantum Learning
- Advanced Excel — Excel Technologies

ACHIEVEMENTS

- Winner — Ideacity Startup Idea Competition (analytical problem-solving and strategic thinking under pressure)
- Winner — Research Paper Presentation (communicated complex findings to non-technical audiences)
- Finalist — Hackathon, Christ University
- Winner — Multiple inter-college technical and non-technical events
