PROFESSIONAL SUMMARY

Software Development Engineer (MCA 2026) with strong foundations in Object-Oriented Programming, Data Structures & Algorithms, and full-stack web development. Experienced in building high-performance REST APIs with FastAPI and Node.js, managing relational and NoSQL database architectures, and engineering responsive React frontends. Proven track record of building resilient, low-latency API services with robust fallbacks.

TECHNICAL SKILLS

Languages:	Python, JavaScript, TypeScript, SQL, Java, C
Core CS Concepts:	Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), REST API Design, Database Design & Normalization, Async Programming
Backend & Web:	Node.js, Express, FastAPI, Flask, RESTful Web Services, CORS
Frontend:	React, TypeScript, Vite, TailwindCSS, Chrome Extensions (Manifest V3)
Databases & Tools:	SQL (PostgreSQL/MySQL), MongoDB, Git, GitHub, Postman, Linux/Bash, VS Code

SOFTWARE ENGINEERING PROJECTS

Sentinel-Agent v2.0 – Asynchronous API Monitor [Live Demo] — Python, FastAPI, React, TypeScript

- **Asynchronous API Engine:** Built a FastAPI backend to ingest and process 500+ simulated system events across an event processing pipeline.
- **Fault Tolerance & Uptime:** Designed classification logic and custom fallback handlers ensuring 99.9% uptime during third-party service outages.
- **Alert Optimization:** Implemented structured logging and event evaluation rules, cutting false-positive alerts by ~35%.

Job Portal Application – Dual-Database Web Architecture [GitHub] — Node.js, Express, React, SQL, MongoDB

- **Hybrid Database Architecture:** Integrated SQL for structured job metadata alongside MongoDB for candidate resume profiles into a unified database layer.
- **Cross-Database Queries:** Engineered Node.js REST APIs for cross-database querying, filtering, and candidate-job matching across 300+ records.
- **Query Optimization:** Optimized indexing and execution paths, minimizing API response times for multi-parameter search requests.

Dark Pattern Detector – Chrome Extension [GitHub] — Python, Flask, JavaScript, Manifest V3

- **Low-Latency REST Service:** Developed a Python Flask REST backend delivering non-blocking response times under 300 ms via CORS endpoints.
- **Async DOM Engine:** Built Manifest V3 JavaScript scripts to parse dynamic web elements asynchronously without blocking rendering.

Sprucer – Resume Alignment Pipeline [GitHub] — Python, Flask, scikit-learn

- **Text Processing Pipeline:** Implemented TF-IDF vectorization and Cosine Similarity to score candidate resume-to-job description fit across 100+ documents.

WORK EXPERIENCE

Junior Software Developer Intern — Edutainer — Jan 2026 – May 2026

- **Frontend Engineering:** Engineered reusable React UI components, improving page load responsiveness and client-side UI consistency.
- **API Integration:** Integrated client-side state management with backend REST APIs, streamlining data synchronization and error handling.

IoT Engineering Intern — Hardware Technologies, Vijayanagar — 2024

- **Firmware & Sensor Pipelines:** Programmed C/C++ firmware on Arduino microcontrollers for continuous data collection and real-time environmental data streams.

EDUCATION

Master of Computer Applications (MCA) — 2024 – 2026
RV Institute of Technology & Management | **CGPA: 8.9**

Bachelor of Computer Applications (BCA) — Completed
Surana College | **SGPA: 8.42**

CERTIFICATIONS & ACHIEVEMENTS

- **Certifications:** IBM Enterprise-Grade AI, Power BI, Advanced Excel
- **Awards:** Winner – Ideacity Competition & Research Paper Presentation
- **Hackathon:** Finalist – Christ University Hackathon
